

COAL HANDLING PREP PLANT

Specifications:

- » The plants operate around the clock
- » Plant one operates at around 750 tonnes per hour
- » Plant two operates at around 550 tonnes per hour
- » A load of coal takes 15 minutes to be processed through the plant to the pad
- » 2012 was a record year with 8,050 hours of production - very impressive given there are only 8,760 hours in a year

50m tonnes
of clean coal
produced from 2002
to Nov 2015
